Courteous Reader, I have in the press a Compendium of Physick in four books: The first, a Physicall description of the body of Man. The second, a description of the Causes, Symptomes, and Cures of all Diseases incident to the body of Man. The third, A generall Treatise of the Cures of Wounds, Tumors, and Vicers. The last consisteth of generall Rules for the making of all kinds of Medicines, together with the virtues and properties, with the Doses of most Medicines now in use, all comprised in a small Volume the like not extant.

Old Account,	Moveable Feasts according to the	New Account.
January 30	Septuagesima.	9 February.
February 16	Ashwednesday.	18 February.
April 3	Easter-day.	13 April.
May 8	Rogation Sunday	18 May.
May 12	Ascension day.	22 May.
May 22	Whitsunday.	1 June
May 29	Trinity Sunday.	8 June
Novemb. 27	Advent Sunday.	30 November.

**A Table of the four Terms and their Returns
for the year 1659.**

Hilary Term begins January 24, ends February 18,
and hath four Returns.

Oftab. Hil. January 20. } } Craft. Purif. February 3
Quind. Mil. January 27. } } Oftab. Purif. February 9

Easter Term begins April 20, ends May 16 and hath
five Returns.

Tres Pasch. Apr. 25 } }
Mens. Pasch. May 2 } } Craft. Ascen. May 13

Trinity Term begins June 3, ends June 12, and hath
four Returns.

Craft. Trin. May 30 } } Quind. Trin. June 13.
Oftab. Trin. June 6 } } Tres Trin. June 20.

Michaelmas Term begins Octob. 24, ends November 18
and hath six Returns.

Tres Mich. October 20. } } Craft. Marr. Novemb: 12
Mens. Mich. October 27. } } Oftab. Mar. Novemb. 18.
Craft. anim. November 3. } } Quind. Mar. Novemb. 25.

Behold the learned Lawyers ! void o'th fears
Of fifty one, and th' two succeeding years ;
Have lin'd their Gowns, and made them Pistol proof,
And *Magna charta* clad in Coat of Buff.

And with a bolder confidence, can take
A larger fee for Reformation sake.

A table shewing the Names of certain Havens in and about England, with the Number of the Point of the Compass, that (unto which when the Moon commeth) maketh Full Sea.

January hath XXXI Daies.

Just at beginning *Saturn* leaves his Throne,
And takes possession of the *Scorpion* :
Phœbus distasted, with an angry Square,
Against th' old deting Planet doth declare ;
Because the equal Ballance he declines,
And lodg himielf in th' fallst of the Signs.

January 1659.

Month
days

On Phœbus sullen, Saturn bends his brow,
Opens Heaven-gates, and pours down rain and snow:
Alas poor Mortals woe! who must indure
Their wounding force, with patience wait their cure
He, who will from their force and matice fly,
Must leave corruption, get Eternity.

Very cold winds.

January's Observations.

If we call to mind the Position
of Saturn, at the time of the Suns en-
trance into Capricorn, together with
his quadrate Aspect to the Sun this
Moneth, we may justly fear much
snow, or wet weather, cold and un-
comfortable. Much of this Moneth
is spent in serious and close consul-
tations: Some eminent contest
among great persons, and probably
some man of Eminency, or at least
much taken notice of, is committed
to custody. The London Merchants
discontents seem considerable, and
their late losses by piracy, shipwrack,
and want of trade, almost insuppor-
table. The complaint of the poor of
the city is great and to be lamented.
The Weavens seem to discover some
secret wasting and purloining of
the Common-wealths Treasury, let
them whom it most concerns look
to it.

Auri saepe gerunt ingentia pondera
Muli: sed siccum nil nisi gramen
(edunt.

February heth XXVIII Daies.

Resplendent *Venus* doth with *Titan* joyn,
 And he, old *Saturn*, courteth with a *Trine*.
 She hasteth to the nimble *Mercury*,
 And in conjunction meet in *Aquary*:
 Where from the old mans Tankerd, they out poures
 Clear fountain streams, from hence come suddain showrs.

February 1659.

Before the Moneth doth end, th' infortunes dare
Each one the other with a hateful square;
The one is envious, hateful, silent, sad,
The other furious, fighting, wrangling, mad:
They, like to fire and water do agree,
For in their Natures, there's Antipathy.

Let Women with child, or near
the time of their cravel, be very care-
ful in a more than ordinary man-
ner, this month, and the month pre-
ceding; especially those, that find
their body abound with abundance
of blood or choller: confer with the
Physitian, or you may repent it. A-
bout this time much dissimulation
in Treaties. Our Grandees want
money. Haley saith, Rex erit pauper, &
quod ei necesse est petierit a pop. lo. Of
this Aphorism the Commonalty are
sensible. Some notable robberies
committed; I hope no more Plots
discovered among us: certainly,
there appears some cross and unto-
ward proceedings about the latter
end of the moneth, or beginning of
the next: happily we combat with
some of our Enemies. Surely some
eminent warlike action happens
near this time of Europe, probably
between the Swedes and Poles, the
Tartars and Muscovites, or some emi-
nent action thereabouts.

March hath XXXI Daies.

As Regal Titan cuts th' Equator Line,
 Heroick Jove presents him with a Trine;
 But furious Mars opposeth him, whose merit
 Might well appease a far more furious spirit:
 But all the rest o'th' Planets do agree,
 Which makes the air tend to serenitie.

The Stars incline the Shouldie-
ry and Gownmen to Discontents,
and prejudicial opinion against each
other; yet it scarcely comes to the
birth: For at the vernal Ingress,
there is a very propitious face of
Heaven. Waters seem at present in
a settled and fixed condition, and
most parties pretty well contented
and appeased. There is a perfect
harmony between the Clergy and
Authority. At Rome some honour or
place of eminency is confirmed upon
an Ecclesiastical man: indeed, men
of that coat are in much esteem and
in a flourishing condition in most
parts of Europe. Who knows but
that there may be a compliance with
Spain about this time? The distres-
sed Merchant, and the Commonalty
in general do earnestly desire it.
Blood and choler will much abound
in people of sanguine and cholerick
constitutions, that are young and
in health: to preserve health in such,
evacuate the superabundance thereof
by Phlebotomy and purging.

April hath XXX Daies.

The two infortunate and crabbed foes,
Do now comply. Whilst *Chronos* doth oppose
The *Sun* and *Hermes*, in Conjunction met,
Which makes the air both windy, cold, and wet :
They both square *Jove*, and friendly doth behold
The Queen of Heaven, and *Pyrus* bold.

Many discords and Law contro-
 versies appear about this time.
 There is yet a Religious party un-
 satisfi'd, and Authority opposed by
 Familiars and Friends & Antient
 Laws and Customs contended for,
 whilst another sort abuseth both
 parties with Pamphlets and Fal-
 sties. A busie time for Mercurialists,
 and many Zealots pretending high
 Revelations, as busie as may be.
 Our Grandees are in great care to
 give content to all, and are vigilant
 and provident for the safety of Ire-
 land. Variety of intelligence this
 Moneth: the Air somewhat incli-
 nable to contagion, and some Epi-
 demical Disease afflicteth us. The
 Spring is forward, seasonable, and
 promising plenty.
 The 26 day there happeneth an
 Eclipse of the Moon in the Eve-
 ning, she riseth eclipsed, the beginning
 thereof is not seen by us: at the mid-
 dle of the Eclipse, or greatest obser-
 vation, she is about 5 deg. above the
 Horizon.

May 1659.

Month daies. If all be true that ancient people say,
This Month was call'd the merry month of May :
Since all the Planets pretty well agree,
Let's make this month a month of Jubile :
Take pleasure while you may ; whilst it is fair,
Wlk in the fields, and take the fertile air.

ΔΨ♀ ΙΙ ρ.

A wholesome and
 Last Quar 44 m.
 fertil ax, (p. 10 m.

May's Observations.

This Month is in every particular comfortable, the weather reasonable, the people peaceable; for the Stars in their courses and motions do friendly Aspect each other. A wholesome and fertile Air, and the minds of men and women more inclinable to pleasure then plotting. The Law and Justice is manifested and esteemed, and wise men honoured, especially those that belong to the Law. Those things that are spoken of in the German Prophecies, many of them will appear about this time. There is no Aspect of enmity in this Month, but the opposition of Saturn and Venus. Women will scold with their husbands, a thing of no great moment.

June 1659.

Month daies.
If this were all, 't were well, but view the sky,
And you may Mars and Saturn both descry:
Lo how the Heaven's disturb'd, w^hilst they oppose
Each other: Hermes with them both doth close:
One spreads thicke clouds, which iⁿ other parts in sunder
With spiritely fire, and great storms of thunder.

June's Observations.

There is a probability of some
peaceable Deuises to our States,
from many parts beyond the seas,
even from their Enemies. Many
consult about the raising of money
for the States use. The City
Gentlemen generally pleased with
the present proceedings, much mo-
ney coyned, and much thereof false
and counterfeited. But before the
end of the moneth, without doubt,
malice and hatred among some
great persons, will break out and
come to light. Who is that, who
hath lately kept up into prefer-
ment, that so many envie, detest,
and detract from his honour?

About the middle of the Month
or a little after, the two malevo-
lent Planets Saturn and Mars, dis-
turb the Air with blustering and
fiery conuulsions, to the distur-
bance of the Day-makers.

July hath XXXI Daies.

The nimble *Stilbon*, and the Queen of Love,
The first with *Mars* the other treats with *Jove*.
Venus with *Trine*, and *Phabus* with a Square,
Aspects old *Saturn*, and doth cloud the aire.
To meet with *Sol* & *Jove*, *Hermes* doth hie,
Beholds th' Infortunes with an envious eye.

July 1659.

Month
days.

Mars mounts the Bull, forsakes the Zodiack King,
Treads down the fragrant Pastures of the Spring :
unsheaths his sword, prepareth vengeance Rod,
To execute the wrath of's angry god :
For what the Eclipse to Mortals did foreshow,
His angry influence will make them know.

Julie's Observations.

Many Willives and much Intelligence arrives to our Stern this moneth, and principally from Ireland. Our Athenians desirous to hear of the Affairs of Poland, Ravaria, Tartaria, and Italy, and the adjacent parts. With us we have many serious, close, and weighty consultations at the Stern, disputing of rectifying and emending of old Laws, Customs, and Privileges. Whether we have any more then ordinary consults or counsel, a General Assembly or Parliament, let time discover.

On the 23 of this moneth Mars enters the opposite degree, or the degree of the Sun, in the first Lunar Eclipse: and on the last day the Cusp of the Western Angle, the effects of that Eclipse by this time begins to appear: Nay, for all Ptolemy's Rule, I believe operates very forcibly by this time. And I fear the sad estate of Ireland will soon inform us.

August hath XXI Daies,

Behold in Heaven a wonder, *Mars* doth dare
 To affront the *Sun* and, *Phaëton* with a square,
 Though clad with flames, bristled with beams about
 Of Heavens fierce Lion. *Venus* is quite out
 With *Saturn*, and with stout *Mars* doth comply;
 The highest two aspect with amity.

August 1659.

Month
days.
You angry Zealots, who highly pretend
True zeal your path, and heaven to be your end,
Cease to be turbulent, and bend your knee,
Cease to appease God's wrathful Majesty:
Cease to be turbulent, to heaven pray
That our afflictions God may turn away.

August's Observations.

Let every man pray for the peace
and safety of Ireland, our own and
Neighbor Nations. Some parties
pretending Religion, and much
zeal, prove turbulent and much dis-
satisfied, the heavens intimating
Rebellions, slaughters, &c. and it to
happen under a colour of Religion
and purity. Truly, I fear the Ro-
man Clergy and the Jesuitical Fa-
ction, may put in execution some
design, or about this time do con-
trive somewhat against the people
we call Protestants. I pray God
deliver them from a Massacre, or
such like Judgment: I believe the
long Robe, or some of the Eccle-
astical Hierarchy, undergoes the
reproach of Authority: For some of
the same Tribe advanced to honor
Italy, and the adjacent parts, are in
great danger of suffering by a se-
vere want. Let the Farmer hasten
his corn into his Barn. Many co-
munications, fiery flashings, and
combustion in the Air, happen to
the prejudice of Vegetables.

September 1659.

Month
days.

The Heavenly Bodies pretty well agree,
Oh! quoth my fancy would 'twere so with me.
The effects o' th' Eclipse shew ba'tails, blood, and murder,
For Mars who rules is master of disorder:
And he seven moneths possesseth Gemini.
London beware. I can but pity thee.

September's Observations.

Some Reverend Judges, or men in high places, or Executors of the Law, shall act very honourably, and accrue a popular applause about this time. About this time the effects of the first Lunar Eclipse appears in its vigour. We hear of Battails slaughters, Depopulations, Firings, and such like destructions in many places of Europe; especially in Poland, Russia, Campania, &c. Italy, and near the Turks Dominions, Tartars, Moscovias Swethland, Westphalia, Bavaria, Sea-fights, and Pyracies, with shipwracks about the Streighes. God preserve the peace of Ireland, and let the Dutch Adventurers beware of misfortune. I do verily believe some Epidemical Disease, or Pest, sweeps away many of the common sort of people in Ireland, and the rest of the places aforesaid: from thence it straggles through the West of England, and London scarce, ly goes scot-free. The weather reasonable, and well pleasing to the painful Husbandman.

October 1659.

Month
days.

Before o'th' effects of one Eclipse we're tree,
Another, near as big as first we see;
Shee's in her exaltation; yet think not,
That she in pride doth wear this beaurty spot;
But at the will of her Creator must,
Prodigious be, and shadowed by dust.

October's Observations.

Holland beware Inundations of
water, and over-flowings of the
sea-banks near this time; most pla-
ces wh'co lye near the sea, and are
subject to such mischief are in much
danger this winter. The sea trou-
blesome and dangerous, and few
Merchants of Europe thrive in
their Maritime enterprises. Our
Gentlemen, Judges, and Lawyers,
and most of the Senators of our
Nation, protest and declare much
for the publick interest: but self-
ends on the one hand, and treachery
and underhand dealing on the o-
ther, puts the Commonalty in
doubt of non-performance. Many
losses, troubles, and mischiefs hap-
pen to the painful husbandman a-
bout this time.

*Rebus in humanis misere fortuna iocan-
(tur,
Inter pauperiem divitiisq; rotans.
Evenit hos rursum quos improba pres-
(erat ante,
Præcipitatq; solo, quos mox ad astra
(tulit.*

The 20 day of this month, ano-
ther eminent Lunar Eclipse hap-
peth: of the effects, hereafter.

November 1659.

Month dates.

The fourth day of this month soon after three,
Behold i'th' Heavens a famous prodigie!
The Sun's Eclipsed, and the standers by,
Are *Falciſer, Venus, and Mercury.*

If I were there, I would presume to ask
Himſelf, why he puts on that ſhady mask.

November's Observations.

This moneth on the 4th day,
there happeneth another Eclipse,
viz. of the Sun, and it is a very e-
minent and remarkable one; the
effects of this and the former will
ſhew themſelves in 1660. The firſt
Eclipse now ſpending its influence
this Autuminal quarter. Some for-
mer deſigns, obſcurely laid, are a-
bout this time made manifeſt and
apparent. I fear ſome diſcontented
Londoners, or ſome inhabiting there-
in, may give Authority ſome di-
ſtaſte, and produce ſome trouble.
God defend the City from fire
and fiery ſpirits. We have news,
and news upon news, from Spain,
Flanders, and the Spaniards Domini-
ons; and the heavens ſeem to inti-
mate high and tranſcendent coun-
ſel or actions, on both there. And to
me it ſeems probable, ſay the Wea-
thers declare it, that many publick
and private Negotiations and Em-
baſſies paſs between Spain and
France, earneſtly deſiring peace, the
French upon high terms.

December 1659.

Month
days.

Oh! how do wars affright us? when they cease,
Oh! how we murmur? sure w^e are worse for peace:
In peace and plenty alwaies pride doth reign,
Pride causeth war, war scarcity again:
What then remains? but that we all should cry,
Not to be born, or being born to dye.

From August this year, till the
next March, the Planet Mars hath
continued in the 18th Sag. as if De-
vine Providence had allotted the
City of London to suffer much of
the effects of the first Lunar Eclipse:
and Sag. occupied the Cusp of the
12th house at the same time the E-
clipse was celebrated: Nor can I
in reason or Art conjecture, that
Flanders, Brabant, and most of the
adjacent parts are free from the af-
flictions of the sword and sickness:
yet it is no mean affliction can
make the grave and lofty Spaniard
bow, yet he seems inclinable to
Treat. And the French in a formi-
dable posture.

Towards the latter end of the
Month the Heavens do smile, and
I hope we may so too: the Air se-
rene and pleasant.

An explanation of the Almanack and other Tables.

Each month hath 2. pages, the left hand page hath 6 Columns, the 1. sheweth the month days, the 2. week daies, 3d. festival & daies of note, & twice in the month the place of the 5. Planets & Dragons head at Noon; the 4. sheweth the daily motions of the Sun, 5. of the Moon, 6. the Aspects of the Moon to the Planets, where note that m. standeth for morning n. for night, a. afternoon, b. before noon, o. at noon. In the right hand page is three Columns, the first sheweth the dayes of the month, 2d. the Planets Aspects among themselves, the change of weather, & Lunations: 3d. monthly Observations.

The tide Table hath two pages, the first page shews the names of certain havens, with the number of the point of the Compass, &c. the 2d sheweth the time of high water in hours and min. in any of the places mentioned in the Table. Make use of them thus, first find the age of the Moon in the Almanack, by counting the daies from the day of the change, number not the day the Moon changeth on, unless she change early in the morning, with the Moons age repair to the table on the right hand page, and in the first column find the age of the Moon; on the head of the table, the number of the Compass answering to the place, and in the common angle you have the time of high water. For example, on the tenth day of March I seek the age of the Moon, & find her 27 daies old. I find 5 answer to London, which number I find on the head of the table, and the Moons age in the first Column, in the place meeting I find 12.36. by which I know that it is full sea at London, at 36 m. p. 12. that day.

Astrological Predictions

for the year 1659.

I here invoke *Mercurius* to my aid
And all the Muses : Let it not be said,
But to your Lovers you repay good will;
Disdain no now to impart some of your skill :
Sun, Moon, and Stars assist me with your rayes,
Grant power, as you were wont in *Hermes* daies.

Videmus enim effectus multos hic in terra, quor-
um causas ignoramus: beneficio autem vere
Astrologie causam suam ac originem supra nos in
Cœlis habere cognoscimus, sath Zanchius. We see
many effects here on earth, whose causes we are
ignorant of; yet by the benefit of true Astrology,
we know they have a cause and production above
us in the Heavens. Yet at this day there are a
people so stupid, who, though they dare not
say, that the Majesty of God was diminished
in the making of the world, yet can affirm,
that the Majesty of his Word is much vilified, if
it be applyed to what he hath made. He that holds
such an opinion, that Gods word and works
should be such different things, that the first is dis-
graced by the other, I account a Blasphemer in a
high nature. The Scripture was written to the
end, that men might learn by it to know God.
Let me ask them, How can the Scripture teach
us to know God? Doth it barely say that there is

Astrological Predictions.

a God, and there I leave us to our discretion: Or
 both it teach us without or by his works? If
 without his works, what manner of teaching is it,
 unless you say by inspiration? If by his works,
 then surely he teacheth us by natural things, for
 they are his works. Thus Moses taught us the
 knowledge of God, even by the Creation. God
 himself proves himself to Moses, by the transmuta-
 tion of his rod into a Serpent, et c. contra. And he
 demonstrates his power and sovereignty to the E-
 gyptians, by turning their Rivers into blood, the
 dust into lice, &c. And affirms himself to Cyrus
 to be God, and proves it by his works, Isaiah 45.
 ver. 5. I am the Lord and there is none else, there is
 no God besides me: I girded thee, though thou hast
 not known me. ver. 7. I formed the light and crea-
 red darkness, I make peace and create evil: I the
 Lord do all these things. ver. 12. I have made the
 earth and created man upon it: I, even my hands
 have stretched out the Heavens, and all the host
 have I commanded. Consider of the expostulations
 between God and Job, which I have hereto fore-
 mentioned. I hope this will satisfy my Antago-
 nists, who think I have much erred in justifying
 Astrology, (being a natural Art) by Scripture: I
 hope I may well prove nature by Scripture, since
 God proved to man, what he affirmed by nature:
 and Jesus Christ his Doctrine by natural things,
 as the preaching of the word, by the Sower, and
 the resurrection, by a grain of wheat cast into the
 earth; For truly, if we consider God in the ab-
 stract, we can say nothing of him positively, for I
 know not who hath received from God such a
 Theology: We can say somewhat of him nega-
 tively with Dionysius, that is, We can say what he
 is not, but what he is we cannot affirm. There-
 fore to speak of God without nature is more than
 we

for the year 1659.

We can do: and to speak of nature without God is more than we ought to do, lest we attribute that to nature, which belongs to the Spirit of God working in nature.

Having said a few words in justification of my self, in probing the legality of a natural Art by Scripture, some will expect that I should answer many other objections, which I shall make as a thing altogether altogether needless, and wanting paper room: and appeal to every rational man, if he doth but consider, that his body and the whole universe, is made of the same matter (though not in the same form) viz. of a composition of contrary elements, whether he seeth not a reason likewise of the influence of the superior Bodies upon the inferior: How do things insensible frame Predictions as flourishing of Plants and creatures that are sensible only, which I shall not mention, every man being able to predict the change of weather by the creature? Doth not men's crazy bodies, aches in their limbs, and corns on their toes certainly predict the change of weather? And if he seeth (as most men do) health and sickness, plenty and scarcity, depend upon the various inclination of the air; as it is temperate, or too hot or cold, too dry or moist, and yet for all this will not be the cause of the variations of the weather, from the motions and various configurations of the heavenly Bodies: If I buy him in a mortar, he will not forsake his opinion. But since I find no opposition from ingenious people, I shall forbear making further Apology, and treat Astrologically of this years transactions, beginning with Entrance into V, with which considering two Lunar and one Solar Eclipse.

m 1659
 Mens. D. H. m
 March 10. 1. 2
 Lat: 51 Deg. 32 mi
 London.

Here is a very propitious face of Heaven, & up-
on the Cusp of the Ascendant in Taurus, to ☉ in
the ninth free from all impediment, and malevo-
lent rays. The ☉ is Lord of the Ascendant and
without controversy, may be preferred before any
other Planet in judgment. Cum fuerit Dominus
anni Sol, et bene dispositus, fortunatus scilicet et fortis,
liber ab impedimentis, significat sublimitates atque
exaltationem regum, et gloriam, et honorem: et
quod exalabitur Rex illius regionis, et sollicitabitur
circa sui regni augmentationem; et nedum Rex sed
etiam quilibet secundum suum esse, atque secundum
suam naturam, seu nationem ad suum statum augmen-
tandum: et significat utilitatem, et profectum eorum.
Et quod avertent facies suas à rebus displicentibus
Deo et ab injuriis, à rebus inhonestis: significat cri-
am

Astrological Predictions.

am bonum esse divitum et magnatum atque nobilium et horum quibus debetur honor ab hominibus. When the Sun shall be Lord of the year, well-disposed, fortunate and strong, it prenotes high and lofty designs of Kings or Supreme Rulers their glory and honour: he shall increase his power and augment his Dominions and Revenues, and not only the King but every particular person, according to his capacity, way, or employment, shall increase his estate, for it signifieth profit to King and people: and that they shall be ashamed to act things displeasing to God, and shall turn their faces from injuries, oppressions, and things dishonest: it signifieth much good unto persons of quality, to men honourable, and such as deserve honour and respect from men. His position in the ninth house hath the same signification, but I must be brief, Albumazar that famous Arabian goes on Et si fuerit dominus anni, de dominus Ascendentis, fueritque liber à malis, gaudebunt reges, et habebunt latitiam, et securitatem, et augmentabuntur anno na, quadrupedes et aves, et omnia super quibus habet Sol significatum. And if the Sun shall be Lord of the year and of the Ascendant, and free from the influences, Kings or Governours shall rejoyce, and be secure; there shall be plenty of Corn, Cattel and Fowl, and of all things which Sol governeth the revolution being Diurnal and the Sun well placed above the earth, significat exaltationem, et eventum rei magnæ; in revolutione illa, significat crim bonitatem, et tranquillitatem terre, cui præ est illud signum, in quo fuerit, et civium illius regionis, It signifieth the atchievement or chieff of some great thing, and the goodness and tranquillity of the Land, subject to the Sign wherein the Lord of the Ascendant is, and to the Cities thereof. I fear want of paper, which forceth me to foreteare expounding

Astrological Predictions

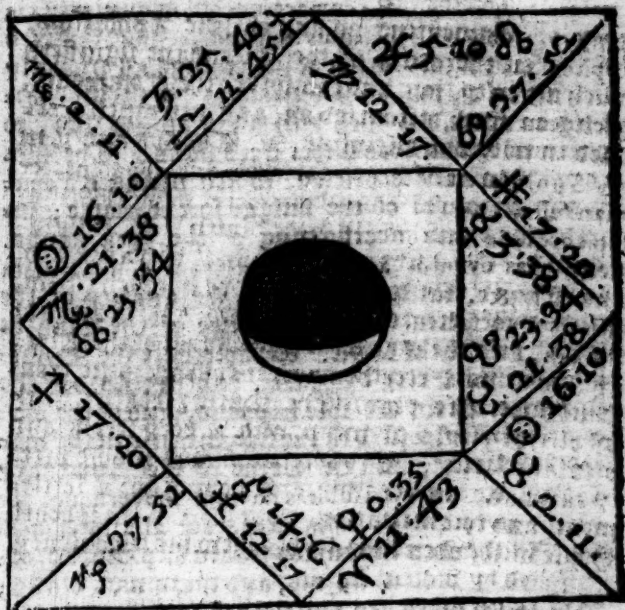

ring of commenting on any of these Apophisms.
 Jupiter in the Cusp of the Ascendant signifies
 much alacrity, joy, and comfort to the Commoner;
 Religion much discoursed on, and men much exer-
 cised in religious discipline, &c. The Sun and Moon
 △ Significat quoddam lex et sapientia erit apparsa, et
 manifesta; et quoddam erunt honorati ex in proci habiti
 sapientes, et maxime illi legis, saith Haly, it signi-
 fies, that the Law & wisdom shall be manifested,
 and esteemed, that wise men shall be in much esteem,
 the Apophism pertaining to the Law. It is Lord of
 the 9th, and is the general significator of the Cler-
 gy: who will receive much encouragement from
 Authority this year. The Spring begins with
 wholesome blasts of wind, and a very serene and
 pleasant season. The spirits of most people pre-
 tely calm and temperate; most hoping for a settle-
 ment, and reconciliation. But Mars in the seventh
 House will, when time serves, shew his turbulency.

My reufed fancy here doth hold my hand,
 To make no farther progress doth command.
 My pen: for fear my lugard lines should charm
 Some to security who're near to harm.
 For three Eclipses dreadful to behold
 This year is to be seen, and this bold Nations,
 Commands them all, which to most Christian
 Brings sickness, death, and many tribulations.

Moon Eclipsed April 26.

	H.	M.	S.
The beginning at	6	34	7
The true opposition at	7	54	50
The greatest obscuratio at	8	00	4
The end at	9	26	2
The duration	2	51	54

for the year 1659.

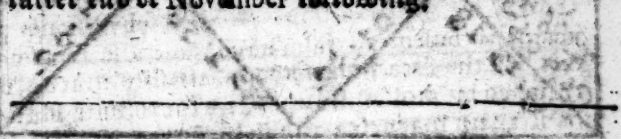

In the handling of this and the two other Eclipses, I shall observe this method; First consider the kind or quality of the events, and the Planet who is Lord thereof. Secondly unto what Kingdom, City, or people, the effects doeth principally appertain. Lastly, the time when they shall begin and how long they shall continue. This Eclipse happeneth in the Ascendant, Quæ vero tempore deliquii or emali magis positi fuerint, fructibus, adolescentiæ fundamentis eventura. Eclipses that are near the East Horizon, do shew that the effects will concern fruits, youth and their foundations, saith Ptolemy. The sign wherein the Moon is eclipsed is a fixed sign. Fieri igitur res significant quæ illis merito debentur: debentur autem

Astrological Predictions

edificia, quoniam ita comparatum est, ut quae edificia manere debent, sub signis fixis edificentur. Fixed signs have signification of such things as properly belong to them; now buildings do properly belong to them, for such buildings as are long to continue are builded under fixed signs. The sign is of the watery triplicity, which presages a consumption or rot of the vulgar sort of people; inundations and overflowing of the Sea banks. Qualitas eventus à natura scellarum dominantium bellis, &c. saith, Dasipodius, the quality of the events is taken from the nature of the Planets which rule the Eclipse. As attribute the Dominions of this Eclipse to Mars, he being Lord of the sign wherein the Eclipse happens, and of the watery triplicity, posited in the fourth house in the watery triplicity, and in Trine to the Luminary Eclipse. In mari subitas navium subversiones per ventos turbulentos, fulmina, aut alla huiusmodi &c. In the Sea he denotes sudden shipwrecks, occasioned by violent storms, and inordinate blasts; he rises up wars, sea and field fights, &c. Proclus saith, In decem vero mediis, olivas et aerem exsiccat, et febres aestuosas facit; A Lunar Eclipse in the second decanate of m d peth the Dabes and corrupteth the air and causeth many burning feavers. Those Kingdoms, Nations, or Cities that are under m d peth shall be subject in four measure or other to the influence of this Eclipse. Or if either of the aforementioned signs be the Ascendant, mid-heaven, place of the Sun or Moon, at the birth of any one, or beginning of any new thing; that person then born, or that thing then begun, shall be subject to such afflictions, as the malignity of the Planet Mars can afford them; and the nearer to the Angle or place of the Luminary the

for the year 1659.

Eclipse falls, the more strong and forcible will the effects prove. The middle of the Eclipse being upon the horizontal line, the effects will soon show themselves. Most Astralogians adhere to the opinion of Ptolomy Lib. 2. Quadrip. Chap. 6, Cuni locus ille incidere in orientalem finitorem, significat eventuum exordia, circa primos quatuor sequentes statim deliqui menses futura esse, vehementiores autem progressus in primo triente totius durationis. If the Eclipse shall happen in the horoscope, the beginning of the events shall be from the fourth month after the Eclipse; but the more vehement progressions of the effects, will be in the first trient of its duration. According to this rule of Ptolomy, the effects of this Lunar Eclipse will begin about the latter end of August, and continue till the latter end of November following.

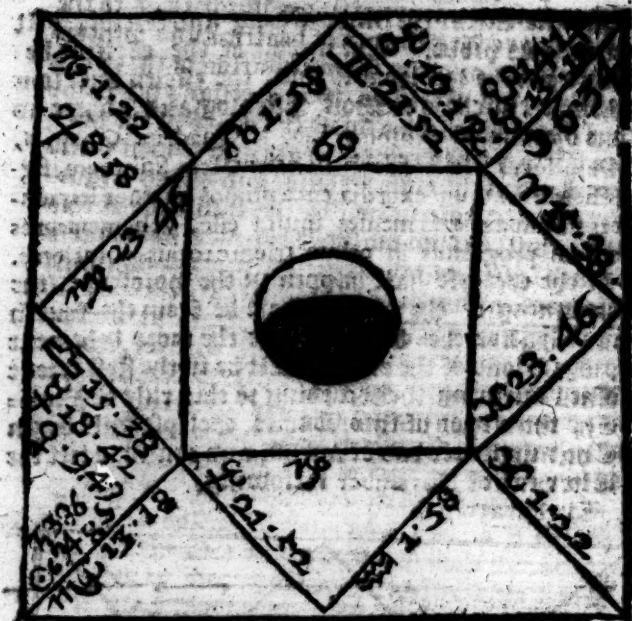

Moon E. lip'd October 10 in the morning.

This

for the Year, 1659.

This Eclipse happeneth in a fixed and earthy
 sign: what an Eclipse signifieth in a fixed sign, I
 have already declar'd. The Arabians say, an
 Eclipse in the earthy Triplicity is a forerunner
 of scarcity of Corn and fruit, and all such things
 as are annually sown. The sign is also bestial,
 and the Eclipse happeneth in the eighth house, peo-
 ple shall suffer much prejudice by the death of their
 great and small Cattel, and Proclus is of that opi-
 nion: In Tauri denario primo, nec morboque grassa-
 tur in pecudes; An Eclipse of the Moon in the first
 ten degrees of Taurus, signifieth many diseases,
 with death it self among cattel. The ☿ of ♀ is
 near to the ♀ secondeth the former judgment. Venus
 claims the dominion of the Eclipse, as being Lady
 of the sign where in it happeneth, with her we must
 remember being Lord of the Mid-heaven, Venus in

in Libra & not far from her with Spica virgini-
 nis a Star of the nature of ♀ & ♄, ♄ in Δ to the
 ♀ all these are Arguments of health and prosperi-
 ty to mankind, or at least a mitigation of the effects
 of the other two Eclipses. But ♄ resigns his pow-
 er to ♀, who possesseth almost the Cusp of the MC,
 and in Δ to ♄ he is retrograde and almost stati-
 onary, Lord of the eighth house, and much digni-
 fied in 4 & 6; Those subject to the influence of this
 Eclipse, will feel his malign influence, by sickness
 and death it self, of which the City of London will
 participate, and men of no mean quality.

The Sun Eclipsed November 4.

Astrological Predictions

Neque innoxie unquam vel suam abscondit faciem Sol, Lunæ contactam interuentu, nec opus est veterum annotata ut ciromus; usurpemus ea exempla, quorum recens in hominum animis viget memoria.

The Eclipse we are now to handle is a very considerable one, almost 9 digits eclipsed: Notandum quodd Eclipse quanto maior fuerit, tanto ipsa est generalior, ideoque effectus sunt vehementiores, atque generaliores, saith Cardan, Note that by how much greater the Eclipse is, so much the more general it is; therefore the effects thereof will be more vehement and general. The Eclipse is celebrated in the seventh house of Heaven, and the Luminaries in the house of Mars: Eclipse Luminarium in signis Martis morbos inducit terminantes omnino in mores. An Eclipse of the Luminaries in either of the Houses of Mars, produceth mortal diseases, so saith Rigel. Considerare oportet tempore Eclipse, vires Planetæ dominantis: nam non Eclipse, sed illius significatio apparebit: saith Tundine folio 309. In an Eclipse consider the strength and position of the Planets, who are Lords of the Eclipse; for not the signification of the Eclipse, but their signification will principally appear. If we mind the position of Heaven at the time of this Eclipse, all the Planets are sub radiis and under the earth, and three of them besides the Luminaries in the Scorpion: Oh! what secret treasons, villanies, conspiracies are contriving and preparing for action, during the effects of this Eclipse; and really intended to be put in execution upon some eminent Grandees or Grandees. On the other hand what dissembling, political stratagems, godly (or rather hypocritical) pretences, do we observe among the great ones, to keep up and maintain their Prerogatives: but quod supra nichil ad me, therefore I forbear, The dominion of

for the year 1659.

of this Eclipse belongs to the two infortunes ♀ and ♂, therefore the more eminent and malevolent will the effects appear. Mars occasioneth such as follow, viz. he stirs up wars, seditions, risings, tumults, imprisonments, besieging of Towns, condemning and beheading of many principal men, martial and acute diseases, corruption of the blood, violent and untimely deaths, tyranny, violence, and injustice in Princes: among the souldiery firing of houses, slaughters, rapines, thefts: great storms of wind, and impetuous, suddain and violent shipwracks: yet it produceth rare and admirable inventions among Mechanicks. Mars is slow in motion, therefore doth more forcibly impresse his malice on mankind, for the sign he is in is humane, the Ascendant of London, and the house he is posited in, is the house of substance, from whence this natural and probable conjecture ariseth, that the City of London & the Inhabitants thereof appear not in the same lustre as formerly, though as proud as ever, their treasure much exhausted. their foreign and domestick trade, not so plentiful nor successful; their Merchants still in fear, and not without cause of piracy and shipwracks: much sicknesse and mortality to London is threatned. We must not omit the signification of ♄, who lurks in the quarrelling angle, and in the Scorpion, there contributing how to afflict poor mortals and to execute the vengeance of an angry God upon a sinful people; he naturally afflicteth men with cold diseases, poverty and misery, scarcity of such cattel men feed on and diseases among them; great tempests and shipwracks at Sea, scarcity of corn and fish; violent inundations and overflowings of the Sea and Rivers; old men dye more then usually: controvertes and Law-suits among the vulgar sort of people. The place subject to the influence of

Astrological Predictions

of this and the former Eclipse, are those that are under the signs mentioned in the first Eclipse. Those that desire a more particular information of places under each sign, let them peruse Mr. Lilly's Introduction, Mr. Wing's Ephemerides, or Mr. Gadbury's Celestial Embassador, and many other Books extant, as well English as Latine. Cardan saith, *Detrimenta rerum sunt maximè locis, quæ sub sunt Ascendenti, &c.* Those Countries who are subject to the sign ascending in an Eclipse, shall suffer detriment; afterwards he saith, that the signs of the same triplicity, and that behold it shall undergo the same affliction; if so, let England be content to undergo her share, and most part of Europe to tast of it. The time when you shall have in my Almanack for the year 1660, if God spare my life so long.

I leave the City when the Summer ends,
And walk abroad to see my Country friends:
Not like a Courtier, nor a new made Lord,
With a new complement at every word;
Who visits rich friends, forgets James and Tom,
I have respect to all where e're I come.
I me no Diurnal, nor Political
Mercurius, yet hired am by all,
For wages small, yet from the heavens I come,
And thence bring news what shall be done at home,
As well as what great actions are at Sea,
Or from far Countries what shall acted be.
Yet I must undergo full many a jeer
From some, whom I thus visit once a year.
Were not for me the Lawyer would not know,
When he must stay at home, or to Term go.
Mechanicks too I dare be bold to say,
You'd not know when to work, nor when to play.

Time

for the year 1659.

Time strict observers, when one year were past,
Would not know when to feast, nor when to fast:
The greedy Usurer that devilish fiend,
Would hardly find when the six months doth end;
The poorest wight, who lives on Parish charity,
Would twice i'th' month come for their nigerality:
Both high and low, who ever dares to flout me,
Doth me employ, nay cannot live without me:
Yet I'me not proud, but ready at your call,
Kind Sirs an humble servant to you all.

Reader, since the writing hereof, the Author is removed to Westminster, and dwelleth at Mr. Cambridge's house a Shoemaker next door to the sign, which was called, the Kings Arms in Kings-Street.

FINIS.

Books worth buying, newly printed and
to be sold by the Book-sellers of London.

A Treatise of Spelle.s, or, an History of Apparitions, Oracles, Prophecies, and Predictions, with Dreams, Visions, and Revelations, and the cunning Delusions of the Devil, to strengthen Idolatry, and the Worshipping of Saints departed; with the doctrine of Purgatory. by Tho. Bromhall. Whereunto is annexed a Treatise confuting the Sadducees denying the appearing of Angels and Devils.

The Vale-Royal of England, being a Historical & Geographical Description of the County of Chester.

Mr. Isaac Ambrose looking unto Jesus: A view of the everlasting Gospel, or, The Souls eyeing of Jesus, as carrying on the great work of mans salvation from first to last; to be sold at the black Bear near the little North door in Pauls Church-yard.

The History of the Constancy of Nature, proving that the world nor any thing therein, doth nor decline or grow worse. Octavo.

The Protestant Evidence, a most learned work, proving that in the 16. several Centuries since Christ, there hath been eminent and learned men that have professed the Faith of the Church of England. Folio.

Also, A Theological Concordance of the Holy Scriptures, of small price, and performeth as much as many large Volumes; very useful for all that desire to attain to Knowledge. Octavo.

Renodeus his Dispensatory, being the sum of all Physical and Chirurgical operations. Folio.

A new Treatise proving a Multiplicity of Worlds, That the Planets are Regions inhabited, & the Earth a Star. 12.

The Cabinet Council, containing the chief Arts of Empire, and Mysteries of State; Discabineted in political and polemical Adhavisms grounded on Authority and Experience; and illustrated with the choicest Examples and Historical Observations. By the ever-renowned Knight, Sir Walter Raleigh published by J. Milton. Esq. Sold by T. Johnson, at the sign of the Key in St. Pauls Church-yard, near the West end.

An History of the World from the Creation to this present year 1658. Written by Dionysius Petavius and others. Folio.

There is now published An excellent Treatise of Physick by Mr. John Tanner. Octavo.

The History of Magick, written in French by G. Naudæus now Englished. A most excellent piece in defence of all the wise men mentioned in the Holy Scripture, and other Authors. Octavo.

Korvior aqua, Cygnæ Canio. Autore J. Lelando, Antiquario. Vaneunt apud Octavianum Pulleyn ad insigne Rose in Camiterio. D. Pauli. 1658. Octavo.

The Refinement of Zion, or the old Orthodox Religion justified and defended. Quarto.

The History of the Wonders of Nature, treating Philosophically and Physically of the Heavens, Elements, Meteors, Minerals, Beasts, Fish, Fowl, Plants, and of Man. Folio.

A.257.
